Creators Premonition of the Telegraph.—In Addison's Spectator, printed 140 years ago, is the following account of a discovery in magnetic common manufaction, said to have been made 250 years before. It has the marks of a myta, but carriously foreshadows the present reality, like some vague prophecy:

"Strada, an Italian Jesuii, it one of his 'Produsinos, gives an account of a correspondence between two friends, in the belp of a certain landstone, of such virtue, that if it touched I won medicals, when one of the needles so touched began to move, the other, though at a distance, snoved at the same time and in the same manuer. He had subscilled to the stock, believing it a legitimate investment which would i stify him as a husiness man. He sow believed it would be found good if the condit of the property could be ascertained. Where has the money gone—who received it? Let us know stockholders are due and freely given to Dr. J. Fowlkes, President of the South Pacific Railroad cannot ask gentlemen to serve on a committee to request additional subscription, nor would I wish to subscribe myself. It is our duty to make a thorsugh examination and hold up to the public the wrong doers, if wrong has been committed. He was in fivor of the most complete investigation, and unwilling to invest more until a thorough search had been made. There are other pertinent questions. How far will the \$200,000 raised, as proposed, go coward our relief? It might be only a drop in the sucket. Let us have a solid foundation to go on, for it is idle to say that \$200,000 will answer; to

nim it seemed plain that some other plan must be suggested than any proposed here to-day, for the purpose of obtaining relief or extraction. Mr. Williams explained that the committee did ant aim at, or wenture upon a perfect report; they could not do it within the limited time given them, but they acted as far as thay were able. They knew from the data furnished by the President the

hat the directors cannot use it, and it must be redeemed to enable them to take any further action. Mr. Bullock asked the President to explain the ground of difference and rights claimed by the old and new companies.

Dr. Fowlkes replied. The old company halds its rights under the act of the Legislature of Texas. The new company holds by presumed right of purchase under a deed of trust, which is regarded as invalid because at the time no law of Texas authorise.

sixty days after the execution of this deed of trust an act was sumitted—expost fixeto as regards our company and not even touching it by its provisions, for by it the sales of railroad franchises were legalised provided a sale was sanctioned by a by-law of the company, passed by two-thirds of the proper lacks. LATE AND INTERESTING FROM NORTHERN MEXI

inst. has the annexed interesting intelligence from Northern Mexico:

We have dates from Monterey to the 27th and from San Laie Potoni to the 22d ult.

From the latter we learn that Col. Coronado was preparing to march from Duraugo to Join the namy of the North, which the Boletin of Monterey states had commenced its march from that place on the 37th, with Gen. Vidaurri at its head. This division is the second column or division of the army which will unite with that under Colonel Znazua, and the whole, commanded by Vidaurri in person, is to march on the City of Mexico. The new battery and munitions bought in the United States had arrived at Monterey, and Gen. Vidaurri announces to the people of the State that though he will move at the head of an imposing army, he anticipates from this time forward a bloodless victory over the adherents of the Znloag Government.
